

## Yarn and fabric production up in Q1-2019: ITMF

By Our Staff Reporter

MUMBAI, OCT. 16—

The global yarn production increased by +17% between Q4/18 and Q1/19. Higher output levels were observed in Asia (+18%), Brazil (+18%), the U.S.A. (+3.2%) and Europe (+1.6%), according to International Textile Manufacturers' Federation (ITMF).

A communique from the ITMF informed that the overall

**For all your requirement in Linen/Flax Fibres, Tops and Yarns Cottonised flax fibers for cotton spinning in natural and bleached from Wester Europe origin:**

Eve Fabrics Pvt. Ltd.  
ckmody@evfabrics.com

Asian result is due to a +27% increase in Chinese yarn production which outperformed the contraction registered in Japan (-1.7%), India (-3.1%) and Korea, Rep. (-9.2%). A decreasing trend has further been observed in South Africa (-5.3%) and Egypt (-7.9%). Forecasts for Q2/19 are optimistic in Japan, Chinese Taipei, and Turkey.

Global yarn stocks increased by +6.3% worldwide. This results from a +27% improvement in Egypt, +7.7% raise in Brazil, and +3.8% increase in Asia. The latter is the consequence of stock growth in Japan and India, stability in Pakistan and decrease in Korea, Rep. and Chinese Taipei.

Altogether, yarn stocks reached 97% of their previous year's level for the same quarter. Global yarn orders increased by

+12, led by Brazil (+18%), Egypt (+11%), and Asia (+9%), ITMF said.

On the global fabric production, ITMF informed that it increased between Q4/18 to Q1/19 by +3.8%.

This reflects an output raise of +19% in Brazil and an overall +3.6% improvement in Asian countries. Europe saw its production shrink by -0.85% with the biggest drop registered in Spain (-10.1%). A strong decrease of -42% was also witnessed in Egyptian fabric production.

The world output level now reaches 88% of its Q1/18 level. Output levels are expected to further decrease in Q2/19 in

Asia, Africa, and Brazil, stay constant in the U.S.A. and increase in Europe. Production should stagnate in Q3/19 in all regions but Asia, which should register an improvement.

The global fabric stock level has stagnated between Q4/18 and Q1/19. This resulted from raises registered in Egypt (+16%) and Brazil (+3.3%) and decreases of -1% to -2% observed in Asia, Europe and the U.S.A. In Q1/19, global fabrics stocks were 1% above their Q1/18 level. Global fabric orders have dropped by -19% in Q1/19, led by a decrease of -32% in Egypt and -25% in Brazil. Global fabric orders were 8% above their Q1/18 level, ITMF said.

## Spykar launches Vintage and Rare Denim collection

By Our Staff Reporter

MUMBAI, OCT. 16—

Rannvijay Singha, Rajkumar Rao, Sunil Chettri and Gurpreet Singh unboxed the much-awaited Vintage & Rare Limited Edition Collection Jeans by India's top fashion denim brand, Spykar.

The pre-launch campaign included a teaser release on social media to build curiosity and buzz around the product before the big reveal. Here, the celebrities were seen giving a sneak peek of the wooden cask packaging on their Instagram stories and a shoutout saying "stay tuned for the unboxing tomorrow!"

On the launch day, these celebrities unboxed the specially curated wooden cask. After much build-up, the contents of the wooden casks were finally

revealed... The Limited Edition Vintage & Rare Jeans by Spykar! The campaign story was weaved around the concept 'Born 18' to highlight the importance of being 18. The narrative was to focus on vintage denims that have been pre-aged 18 years using authentic treatments. So now, one doesn't have to wait 18 years to get into a vintage pair

## Textiles Secretary Capoor inaugurates IHGF expo

NEW DELHI, OCT. 16—

Textiles Secretary, Ravi Capoor, inaugurated the 48th edition of the Indian Handicrafts and Gifts Fair (IHGF) at the India Expo Centre & Mart at Greater Noida today.

Overseas buyers from 110 countries are in India to source home, lifestyle, fashion, furniture and textiles products from around 3200 Indian exhibitors who are participating in the Fair that will be on from 16-20 October 2019.

Textiles Secretary, Ravi Capoor, while speaking at the inaugural ceremony, urged the organisers of the IHGF-Delhi Fair to make all efforts to ensure that next year the Fair attracts over 10,000 exhibitors. He further said that with the skills of Indian artisans and the crafts heritage of India the handicrafts industry has the potential to achieve greater growth for not only the sector but for the artisans and the exporters and increase the handicrafts exports of India to Rs. 100,000 crore from the existing Rs. 26,590 crore.

Textiles Secretary further said the Export Promotion Council for Handicrafts (EPCH) must explore the possibility of opening handicrafts parks in India and develop those parks as tourism and crafts centres. He welcomed the proposal of EPCH for setting up of handicrafts parks for apparel and handlooms and assured the support of the Textiles Ministry for setting up of apparel and handlooms parks by EPCH. Shifting of the production from small organized units to these parks will be beneficial for the small units as it will reduce overhead costs.

He also directed EPCH to include new segments in the IHGF-Delhi Fair for women entrepreneurs and new artisans and also ensure that the handicrafts industry works on a sustainable model where the entire production process will function as a zero waste manufacturing sector.

Director General EPCH, Rakesh Kumar, said that efforts are being made by EPCH for sustainable development and preservation of environment by focusing on reduce, reuse and recycle at this edition of the Fair. Around 50 tonnes waste material like plastic, metal, wood and fabric are being reused to enhance and decorate IHGF-Delhi Fair 2019.

Director General EPCH further informed that in order to reduce the usage of plastic, the Council has decided to do away with bottled water and instead is offering metal water bottles to the visitors and exhibitors.

## Jeanologia supports the training of young people for a sustainable future

From Tecoya NewsDesk

MUMBAI, OCT. 16—

Jeanologia, world leader in sustainable technology development, is collaborating with international prestigious universities, bodies and institutions to contribute to the development of a more efficient, sustainable and transparent textile industry by supporting the training of young people for a sustainable future.

The company is backing a model that combines training and practice to address the new needs and profiles required for the digitalization and transformation of the textile industry.

The textile industry is one of the most contaminating on the planet and "our objective is to end this evil", points out Carmen Silla, Marketing Manager at Jeanologia. The new generations are driving the change and will be the leaders in finding the environmental solutions of the future, that's why "it is vital to support their training so that they can transfer that commitment and that new business culture".

"At Jeanologia we know how to do that, we've spent many years demonstrating that a new way of producing is possible; completely technological, efficient, ethical and sustainable. That's why we are continuously increasing our commitment to the development of a more sustainable future," Silla highlights.

## Sharing its know-how with the world

This backing of the continuous improvement and innovation has brought Jeanologia to collaborate with various international prestigious universities, bodies and institutions.

Master classes, talks, sustainable finishing training, collaborations with capsule collections, talent rewarding, teaching on digital transformation strategies, on sustainable design and on circular economy, are some its actions at centers throughout the world.

Parsons Art and Design School, the Fashion Institute of Technology in New York, Ravensbourne University in London,

Fashion Design School in Singapore, National Textile University in Pakistan, I-Skool Denim and Jeans School in Amsterdam are some of the schools with which Jeanologia collaborates.

## 10th Edition: The School

With the demand for new job profiles and the need for training in these new professions, Jeanologia started up The School in 2013, a training grant that gives designers the opportunity to acquire all of the skills and knowledge necessary in design for textile laser, textile production techniques, sustainable design and denim product development.

At the same time, the company provides a complete service to its clients since the selected students have four months of advanced training and after that, they have the possibility to be hired by these clients and work at their production centers around the five continents.

More than 50 young people from the five continents have already participated in this training program which is about to start its 10th edition and has an employability of 80%.

## 25 years working for the world

Since 1994 Jeanologia's mission has been to create an ethical, sustainable and eco-efficient industry through disruptive technology and know-how. Their laser, G2 ozone and e-Flow systems have revolutionized the textile industry. They offer infinite design possibilities and garment finishes, while saving water, energy and chemicals, eliminating discharge and toxic emissions.

The company currently employs 220 Jeanologists from 24 nationalities and has clients in 5 continents through its 10 subsidiaries. The export of its machines and services represents 90% of its total billing, reaching 61 countries. The biggest market brands place their trust in Jeanologia, using technology developed by the company.

## Markets extend winning run to 4th day

MUMBAI, OCT. 16—

Benchmark indices closed with gains for the fourth session on the trot on Wednesday, propped up by finance, energy and IT stocks, as investors wagered on an upbeat earnings season amid mixed global cues.

After swinging 250 points in see-saw trade, the 30-share BSE Sensex ended 92.90 points, or 0.24 per cent, higher at 38,598.99. On similar lines, the broader NSE Nifty rose 35.70 points, or 0.31 per cent, to settle at 11,464. A batch of strong earnings from companies like Wipro and ACC enthused trading sentiment, though the overall macroeconomic picture remains sombre, brokers said.

## B'desh and Nepal ahead of India as growth in South Asia slows down: WB Report

WASHINGTON, OCT. 16- (PTI)

Bangladesh and Nepal are estimated to grow faster than India in 2019, according to the World Bank, which said that overall growth in South Asia is projected to slow down this fiscal in line with a global downward trend.

Pakistan's growth rate is projected to deteriorate further to a mere 2.4 per cent this fiscal year, as monetary policy remains tight, and the planned fiscal consolidation will compress domestic demand, it said.

Growth in South Asia is projected to fall to 5.9 per cent in 2019, down 1.1 percentage points from April 2019

estimates, casting uncertainty about a rebound in the short term, the World Bank said in its latest report.

The latest edition of the South Asia Economic Focus, Making (De)centralization Work, finds that strong domestic demand, which propped high growth in the past, has weakened, driving a slowdown across the region.

Imports have declined severely across South Asia, contracting between 15 and 20 per cent in Pakistan and Sri Lanka.

In India, domestic demand has slipped, with private consumption growing 3.1 per cent in the last quarter from 7.3

per cent a year ago, while manufacturing growth plummeted to below 1 per cent in the second quarter of 2019 compared to over 10 per cent a year ago.

"Declining industrial production and imports, as well as tensions in the financial markets reveal a sharp economic slowdown in South Asia," said Hartwig Schafer, World Bank Vice President for the South Asia Region.

"As global and domestic uncertainties cloud the region's economic outlook, South Asian countries should pursue stimulating economic policies to boost private consumption and beef up investments, he said.

## Trade talks between India &amp; US to conclude soon: Sitharaman

NEW YORK, OCT. 16-(PTI)

Trade negotiations between India and the US are going well and will conclude sooner than expected, Finance Minister Nirmala Sitharaman has said.

Last month, India and the US failed to announce a limited trade deal in New York during the meeting of Prime Minister Narendra Modi and President Donald Trump, due to still prevailing differences over the package including access to Washington markets for medical devices, such as stents and knee implants, information and communications technology (ICT) products and dairy products with the removal of price caps.

India is keen on a fair and reasonable trade deal in which its request for market access is secured while also addressing the trade deficit issue raised by the US. "I think the trade talks would conclude sooner. The talks are going on very well. Yes, we couldn't conclude it before the

Prime Minister's (Narendra Modi's) visit (to the US) happened. But both sides are engaged with all commitment," Sitharaman said here on Tuesday.

Sitharaman gave a lecture on 'Indian Economy: Challenges and Prospects', which was organised by the Deepak and Neera Raj Center on Indian Economic Policies at Columbia University's School of International and Public Affairs.

During a question and answer session that followed, Sitharaman was asked about the trade talks between New Delhi and Washington.

Trade tensions between India and the US have been rising with President Donald Trump, championing his 'America First' policy, complaining that tariffs imposed by New Delhi on American products were "no longer acceptable" to his country.

Minister of Commerce Piyush Goyal and US Trade Representative Robert Lighthizer are continuing their

efforts to resolve some of the trade differences.

Sitharaman was also asked about Nobel Laureate Abhijit Banerjee's comments that the Indian economy "is doing very badly" and when the economy is going into a "tailspin" is the time when one should not worry about monetary stability but about demand. She responded that the government is focused on boosting consumption. She said steps have been taken to push liquidity through Non Banking Financial Companies and through the banks to reach the ground level.

In the budget presented in July, Sitharaman had announced Rs 100 lakh crore for the next five years for building public infrastructure. The minister said stronger infrastructure would boost consumption.

She said the government had formed a task force which will help front-load a large part of this money for infrastructure.

"I'm not waiting to even spread it over five years. I'm willing to front load it, even as

the projects come through," she said.

Director at the Raj Center and former NITI Aayog Vice Chairman Arvind Panagariya said recent tax cuts announced by the government would go in the same direction of boosting demand.

"(It) leaves a lot more in the hands of the corporates to invest, so investment is also demand. When we say demand we think only of consumption as demand," Panagariya said.

Asked about the problem of joblessness in India and severe credit crunch, Sitharaman said at no point has she conveyed that enough had been done to tackle the issues and that now the economy has to revive.

"I shall keep doing, I shall keep responding to the global developments as much as domestic developments. I shall keep responding to the macro as much as sectoral (needs). So, it's a completely dynamic approach that this government has taken towards handling the economy.

# US macroeconomic indicators and the Cotton Supply Chain

**Macroeconomic Overview:** Concerns about economic growth remain. The commonly tracked producer manager indices (PMIs) released by the Institute for Supply Management (ISM) were lower in September. The manufacturing PMI, which can be a leading indicator for the overall economy, signaled contraction for the second consecutive month and posted its lowest value since 2009. The ISM PMI representing the service sector, which covers a much larger portion of the U.S. economy, also decreased last month and posted its lowest value since November 2018.

Due to concerns about growth, the Federal Reserve lowered interest rates in September. This followed a rate cut in August. These two 2019 reductions represent a sharp reversal relative to 2018, when there were four increases. The primary cause cited by the Federal Reserve for the cuts in interest rates was the slowdown in economic activity outside the U.S.

With the slowdown global, the U.S. central bank is not alone in taking action to stimulate growth. The European Central Bank (ECB) dropped its deposit rate to a record low (-0.5%) last month and will restart bond purchases to increase monetary supply further. China has made a series of reductions to bank reserve requirements and lowered interest rates. India's government announced a major corporate tax cut in September.

With the deadline for Brexit approaching, Europe is facing significant policy uncertainty on top of weaker growth and may be the location facing the highest risk for a recession in the near-term. The strength of the U.S. labor market, and its ability to continually add jobs, suggests the U.S. faces less immediate risk. A risk for both the U.S. and Europe, however, is that interest rates are falling from already low levels and that central banks may be limited in its ability to provide further stimulus should conditions worsen.

**Employment:** The U.S. added 136,000 jobs in September. Revisions to figures for previous months lifted the estimate for July from +159,000 to +166,000 and lifted the figure for August from +130,000 to +166,000.

Following the revisions, job growth has averaged +219,000 over the past twelve months. Over the same period last year, job growth averaged +179,000.

The rate of growth in average wages slowed last month. The current estimate indicates that wage growth was 2.9% in September. This was the first time in a year that wages improved by less than three percent (year-over-year increases in wages were commonly between 3.2-3.4% over the past twelve months).

The unemployment rate fell from 3.7% to 3.5% month-over-month in September. The unemployment rate is derived from a

separate survey than the one used for job growth (unemployment rate from a survey of people, job growth from a survey of companies). The survey used for the unemployment rate identified a larger increase in employment in September than the survey of companies. That increase, along with a reduction in the number of unemployed, pushed the unemployment rate lower despite an increase in the number of people in the labor force.

**Consumer Confidence & Spending:** The Conference Board's Index of Consumer Confidence fell 9.1 points last month, from 134.2 to 125.1. One year ago, the value was 135.3. Despite the lower value, the current reading remains among the highest ever recorded. If maintained over the next few months, consumer optimism can be expected to support consumer spending during the important holiday sales period.

Overall consumer spending increased 0.1% month-over-month in August (seasonally-adjusted). This was the weakest monthly growth since February. However, there has been strong growth since then, including the 0.8% monthly increase in March. The annual rate of growth in August was 2.3%, which is near the long-term average.

Apparel spending decreased 0.5% month-over-month in August. This was also the lowest reading since February. As with overall spending, there has been stronger growth in the spring and summer. In March, the month-over-month increase was 3.7%. Year-over-year, apparel spending was up 1.1% in August. The weak level of annual growth can be partially explained by the challenging comparison against August 2018. In August 2018, apparel spending was up 6.6% year-over-year.

**Consumer Prices & Import Data:** The CPI for garments was nearly unchanged month-over-month in August (-0.04%). Year-over-year, consumer apparel prices were 1.0% higher. Average import prices per square meter (SME) of cotton-dominant apparel were marginally lower month-over-month (-0.3%, from \$3.47/SME to \$3.46/SME). Year-over-year, average sourcing costs for cotton-dominant apparel were up 3.0%.

Despite U.S. threats to increase tariffs on Chinese apparel having been made more than one year ago, there has not been a decrease in China's share of U.S. apparel imports. China's share of overall apparel imports was 1.3 percentage points higher year-over-year in August (from 40.5% to 41.8%).

The first batch of tariff increases on Chinese-made apparel went into effect in September, and the remainder of Chinese-made apparel imports will face increases in December. Analysis of patterns in pricing data suggests it could take seven to twelve months for any effects of these tariff increases to show up in trade data.

**Labour force participation of women in India is quite low: IMF MD**

WASHINGTON, OCT. 16- (PTI)

The labour force participation of women in India is quite low and one of the reasons was insecurity among them in workplace, International Monetary Fund Managing Director Kristalina Georgieva has said.

Speaking at an event "Women, Work, and Leadership: One-on-One Conversation" on Tuesday, she said, "women just don't feel safe to go to school or to go to work."

The next phase of this campaign included India's top fashion bloggers promoting the limited edition Vintage & Rare Jeans on their Instagram handles through posts and insta-stories. These bloggers were carefully chosen to meet with our brand's aesthetic and theme of the collection. Our main aim was to focus on genuine engagement and quality content rather than chasing the 'number of followers'.

## Vintage & Rare Denim collection from Spykar

Continued from Page 1 Col 6

of denims to kindle or rekindle their 18-year-old spirit. Here, the celebrities were seen sharing personal experiences and stories about being 18.

The next phase of this campaign included India's top fashion bloggers promoting the limited edition Vintage & Rare Jeans on their Instagram handles through posts and insta-stories. These bloggers were carefully chosen to meet with our brand's aesthetic and theme of the collection. Our main aim was to focus on genuine engagement and quality content rather than chasing the 'number of followers'.

To amplify the campaign further, radio was added to the mix. India's leading RJ, Mallishka and her counterparts were been on-boarded to spread the word.

So, What made this collection so special? Spykar's Vintage & Rare Collection Jeans are inspired by aged whiskey. Just as spirit tastes better with age, so is true for denims. The older the denim, the more character. Spykar's Vintage & Rare collection jeans are pre-aged 18 years using authentic treatments and various wet & dry processes to help achieve that mended, long preserved vintage look. These jeans are handcrafted

by skilled artisans and are made with eco-ethical practices. Spykar's Vintage Jeans are a blend of Vintage Vibes with Contemporary cuts for young men.

Mr. Sanjay Vakharia, CEO of Spykar says, "Spykar is known for its product innovation & design. And every season we launch an innovative concept for our customers. We realize that we are catering to the "NOW" generation who can't wait 18 years to create their own Vintage. That inspired us to launch a Pre-Aged 18 year old denim that's handcrafted to deliver the Vintage vibes in Contemporary cuts".

## Rupee pares initial losses; settle 11 paise up at 71.43 against USD

MUMBAI, OCT. 16—

The rupee recovered from initial losses to settle 11 paise higher at 71.43 against the US currency on Wednesday, tracking gains in domestic equity markets and softening crude oil prices.

Foreign fund inflows also supported the local currency, forex trader said.

At the interbank foreign exchange market, the rupee opened at 71.60 against the US dollar. During the day, the domestic unit fluctuated between a high of 71.36 and a low of 71.71.

On Tuesday, the domestic unit had settled at 71.54.

"Strong equity markets, FII inflows, lower Brent crude

prices and ICE Dollar Index helped the rupee recoup some of the losses seen on the previous day," said V K Sharma, Head - PCG & Capital Market Strategy, HDFC securities.

Gaurang Somaiyaa, Forex & Bullion Analyst, Motilal Oswal Financial Services Private Ltd said, "The rupee traded in a range as market participants remained cautious ahead of the important Brexit summit scheduled later this week. On the domestic front, focus will now shift to RBI meeting minutes that will be released on Friday and dovish outlook could keep the rupee under pressure."

Meanwhile, Brent futures, the global oil benchmark, traded

below USD 59 per barrel level on trade uncertainty.

Foreign institutional investors (FIIs) remained net buyers in the capital markets, as they infused Rs 686.33 crore on Tuesday, exchange data showed.

The dollar index, which gauges the greenback's strength against a basket of six currencies, rose 0.05 per cent to 98.34.

The 10-year government bond yield was at 6.47 per cent on Wednesday.

On the domestic market front, the 30-share Sensex ended 92.90 points, or 0.24 per cent, higher at 38,598.99. It hit an intra-day high of 38,666.38 and a low of 38,416.67. The broader NSE Nifty rose 35.70 points, or

0.31 per cent, to settle at 11,464.

The Financial Benchmark India Private Ltd (FBIL) set the reference rate for the rupee/dollar at 71.3186 and for rupee/euro at 78.7419. The reference rate for rupee/British pound was fixed at 90.4134 and for rupee/100 Japanese yen at 65.82.
