

Our experience with SLCP

Background and why Arvind joined

- Arvind joined SLCP when it was founded in 2016
- Engaged in various convergence activities
- Part of project management team over initial three years
- Part of the SLCP council since 2019
- Primary reason to join was to eliminate audit fatigue and to improve the social and labour conditions in the industry over long term

Key benefits for manufactures

- Increased ownership of social data and performance
- Tool will enable to demonstrate leading practices
- Three level approach suits to various needs
- Tool designed in modular way and readjusts according to scale and operating conditions of the factory
- SAC and other accredited hosts adopting the tool resulting in convergence
- This will also increase the comparability of social performance across factories

Experience with implementation

- We have implemented SLCP at two tier-2 facilities (mills) and 5 tier-1 facilities (Garment units)
- All these are third party verified
- Multiple iterations and pilots have resulted in a robust tool build with wider industry feedback
- Past year operations proven that tool and verification works at scale

Thank you
