Text 4: Using AI to eliminate textile waste

Text 5: Sustainability is a business requirement

Text 6: Q&As

**Webinar about “The Fabric Year 2020” - Main Findings and Industry Outlook** **Page 10**

---

The webinar is looking at weaving, knitting and nonwovens since the year 2005. The relative stronger growth of knitted fabrics results from lower production costs for knitted than woven fabrics, new applications for knitted fabrics (i.e. for shoes as of 2012) and a trend to more leisure wear.
